Electric Utility Specifies Ramsey Silent Chain Drive Systems

Application:

- Positive Displacement Blower Drives
- 250 HP Motor at 1791 rpm.
- 1.36:1 Drive Ratio

Components Selected:

- Ramsey RPV612 chain.
- Ramsey RPV sprockets

Description: One of the world's largest electric power generators selected Ramsey silent chain drive systems to power positive displacement pumps in their coal burning plants. Ramsey designed and built a finished package including a complete drive system with chain, sprockets, enclosure, and lubrication system. The complete drive module was shipped to the pump OEM for assembly into their blower package before delivery to the customer. Ramsey worked closely with the distributor sales team, the OEM, and the end user to make sure all requirements were satisfied.

Contact Ramsey Products for assistance with your application. We will provide a no obligation review of your drive requirements.
