

Ramsey Sentry® Wear Protected Conveying Chains

Advantages

Sentry chains combine many of the very best chain features: wear protection, two pin chain joints, and advanced features found in Ramsey high-speed power transmission chains.

Superior Wear Protection

Guard links fully protect pin heads from lateral wear and extend chain life. Chains can run in direct contact with lateral guides.

Smooth, Long Lasting Two Pin Joints

Proven two pin joint design reduces friction and wear, while improving smoothness of operation.

Durable All Steel Construction

100% hardened alloy steel construction with staked pin heads. No pressed metal parts in this robust, impact-resistant chain.

Pre-Stressed

Pre-loading during production reduces chain elongation.

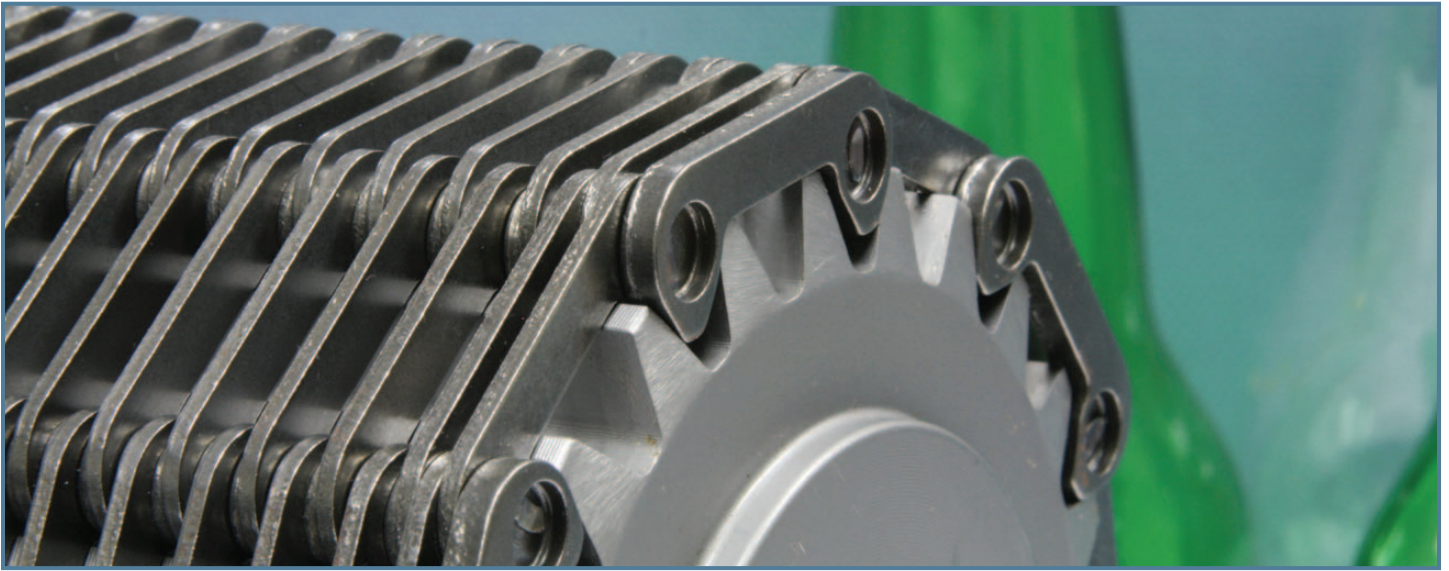

Sentry is Available Exclusively From Ramsey

Options

- Available in 1" and 1/2" pitch
- Chain widths from less than 1 inch to over 20 inches.
- Many assembly options: all links, link-spacer, double stacked, and more.
- Side guide or center guide
- Chain surfaces can be ground for the ultimate in smooth transport
- Compatible with standard Ramsey sprockets
