

Ramsey 3/16" Pitch SC Silent Chain

Advantages

Constructed from hardened carbon steel or corrosion resistant 304 stainless steel, Ramsey 3/16" pitch chain and sprockets are designed to provide smooth, quiet operation to fractional horsepower or high temperature applications.

Flexibility and Strength

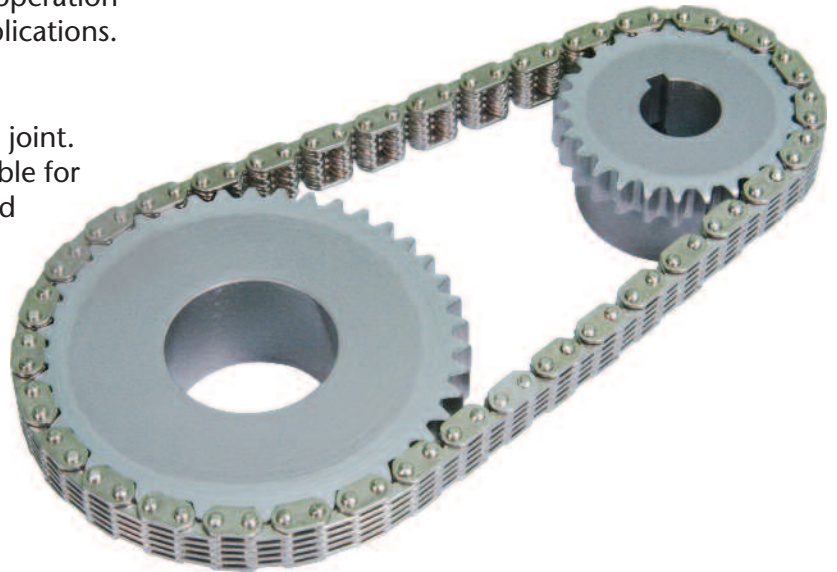

All Ramsey 3/16" pitch chains feature a round pin joint. This allows the chain to backbend making it suitable for a multitude of applications. 3/16" pitch chains and sprockets are also well-suited as original or replacement chains.

Perfect for Harsh Environments

Ramsey's 3/16" pitch chains are capable of running in -corrosive environments without rusting. Additionally, they are able to withstand high temperatures without any issues.

Typical Applications

Ramsey 3/16" pitch chains and sprockets are perfect for applications such as: food processing equipment, packaging machinery, weighing machinery, checkweigher replacement parts, postage meters, sorting machinery, as well as Mettler-Toledo Hi-Speed™ replacement chains and sprockets.

3/16" Pitch SC Silent Chain Are Available Exclusively From Ramsey

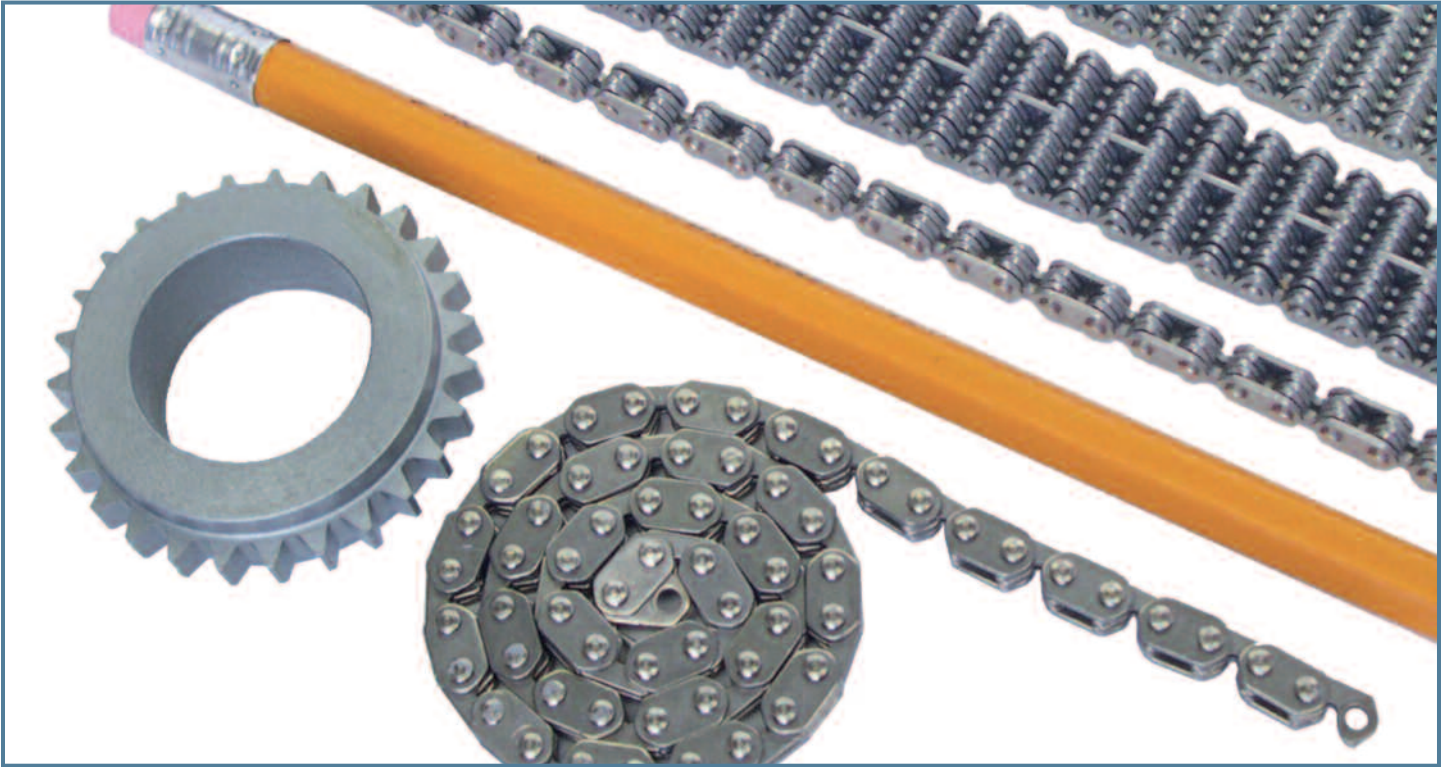

Options

- Available in hardened carbon steel or corrosion resistant 304 stainless steel
- Available in center guide or side guide assemblies
- Available in 10 standard widths; special widths and attachment chains available upon request.
- Compatible with standard Ramsey sprockets
- Ramsey 3/16" pitch chain is manufactured to ASME standard dimensions
